

Machine Skates | 4 – 10 Ton | RT - 10 | Rotating

Model RT-10

Model RT-4

360° Casters

360° Casters

RT rotating machinery skates are designed with easy turning casters which rotate in a full 360 degree circle on two heavy duty tapered roller bearings. The free-turning casters provide the highest level of maneuverability for those heavy machinery moving jobs that require both precision and rugged tools.

Recessed Spindle

Recessed Spindle Design

The RT rotating heavy duty dollies feature a spindle design that is recessed within the caster body. This provides additional clearance on uneven surfaces when moving heavy equipment and machinery. Additionally, the design features a washer/dust cap assembly to prevent the buildup of dirt and grime in the bearing housing.

Handle

Convenient Carrying Handle

RT rotating heavy duty dollies are designed with a built in carrying handle that provides pinch-free handling and a method for two people to carry the rotating machinery skates more comfortably..

Model RT-10

Specifications

Model	Capacity (Tons)	No. of Rollers	Roller Type	Height (in.)	Width (in.)	Depth (in.)	Weight (Lbs.)
RT-4	4	3	Heavy Duty	4.25"	19"	18"	70
RT-10	10	6	Heavy Duty	4.25"	26"	29"	150
